

Preface

Habent sua fata libelli. Books have their vicissitudes. This dictum has once again proved to be true. The story behind the present volume is complicated and long-winded. A Celtic scholar from Ireland once planned a voluminous *Compendium linguarum celticarum* where all insular Celtic languages, including their various historical stages, would be represented. He asked, among others, the authors of the volume in hand to contribute. After a few years, the present editor asked what had become of their contributions. The Celtic scholar from Ireland answered that he had given up his plan because, supposedly, the Goidelic authors were not willing to cooperate. At the same time he suggested that somebody else should take over the project on a reduced scale in order to preserve what had been written already. The chapters written so far, all about Brythonic, were precisely the ones assembled in the present volume. So, willy-nilly, the present editor decided to proceed.

Among the chapters about Brythonic, the only one missing at the time was the one about Modern Welsh. Even after a considerable lapse of time, the author chosen by the original editor was not able to deliver his chapter. The same happened with another author chosen subsequently. After much time had been wasted in futile efforts to find an author for Modern Welsh, the editor finally decided to do the volume without it, in order not to postpone the completion of the work even further. It seems indeed that among the languages and stages of languages treated in the book, a chapter about Modern Welsh could most easily be dispensed with. There is no lack of reliable descriptions of Modern Welsh. The editor feels that the chapters now included in the volume represent a useful and balanced collection.

Since the present editor had to take over a project designed by somebody else, a certain heterogeneity in method and make-up between the individual chapters may have resulted. But this might not necessarily be a disadvantage. Three of the five chapters are in English, two in German. This is also due to the original design. The Celtic scholar from Ireland asked the two German-speaking authors (one Austrian, one German) explicitly to write their contributions in German, because that would give the volume a more international appearance and would, in addition, allow the editor to apply for subsidies from German institutions. Be that as it may, the two authors followed the request and wrote their respective chapters in German. After the change of editorship, the original reasoning was no longer valid. But since the chapters had already been completed at that stage, both authors thought, independently of each other: *quod scripsi scripsi*. It is indeed a frustrating task to translate into a second language something one had conceived in another.

The editor is very glad that the project has finally reached a happy conclusion. He is most grateful to his co-authors for not having given up and for having updated their contributions after a long period of time. He is also very grateful to the publisher for her great patience and understanding and for having in the end speeded up the completion of the work. Finally, he would like to thank Peter Schrijver for including the volume in *Münchener Forschungen zur historischen Sprachwissenschaft* and for his assistance during the making of this book.

Hamburg, March 2011

Table of Contents

Preface	v
Table of Contents	vii
Contributors	xix
Old British (Peter Schrijver).....	1
Abbreviations	1
1. Chronology and early development	2
2. Sources	5
2.1 Old Welsh	5
2.2 Old South-West British	8
3. Phonology and spelling.....	11
3.1 The vowel system between Early Proto-British and the early emergence of West- and Southwest-British (c. 100-800 A.D.).....	11
3.2 The development of the vowel system from Early Old Welsh to Late Old Welsh (ca. 800-1100)	15
3.3 The Old Welsh vowel system (800-1100): spelling and origins.....	17
3.4 The development of the vowel system in Old South-West British (c. 800-1100)	20
3.5 The Old South-West British vowel system (ca. 800-1100): spelling and origins	22
3.6 Diphthongs: spelling and origin.....	23
3.6.1 The <i>u</i> -diphthongs	23
3.6.2 The <i>i</i> -diphthongs	26
3.7 Other developments of the vowels	29
3.8 Development of the consonant system.....	30
3.9 Developments during the Old British period	34
3.10 Spelling, origin and development of individual consonants.....	35
3.11 Prothesis and epenthesis.....	40
3.12 Stress.....	41
4. Morphology	41
4.1 Morphophonology.....	41
4.2 The noun	41
4.3 The adjective	44
4.4 Degrees of comparison.....	44
4.5 Adverbs.....	45
4.6 Numerals	46
4.7 Pronouns	47
4.7.1 Personal and possessive pronouns	47
4.7.2 Demonstrative and anaphoric pronouns.....	53

4.7.3 Interrogative and indefinite pronouns	54
4.7.4 Other pronouns and pronominals	55
4.8 The article	56
4.9 The verb	56
4.9.1 The verb: present indicative	57
4.9.2 The verb: imperfect indicative	61
4.9.3 The verb: present and past subjunctive	62
4.9.4 The verb: preterite and pluperfect	64
4.9.5 The verb: imperative	66
4.9.6 The verb: nominal forms	67
4.9.7 The verb 'to be'	68
4.9.7.1 Present and imperfect indicative	68
4.9.7.2 Present and past subjunctive	70
4.9.7.3 Preterite and pluperfect / secondary future	71
4.9.7.4 Other forms	72
4.10 Irregular verbs	72
5. Syntax	72
5.1 Verbal syntax	72
5.2 Relative clauses	74
5.3 Negation	75
5.4 The particle <i>-(t)</i>	76

Contributors

Peter Schrijver. Professor of Celtic languages and culture at the University of Utrecht. He taught and teaches medieval and ancient Celtic languages, historical grammar of the Celtic languages, Indo-European linguistics as well as general courses on language change. His main interest presently is language contact in prehistoric, ancient and medieval Europe.

Stefan Schumacher. Since 2008 permanent lecturer at the Department of Linguistics at Vienna University, where he is teaching courses for students of Indo-European Studies and Celtic Studies. In 2003 Habilitation in Historical Linguistics at the University of Halle (Germany), in 2010 second Habilitation in Historical Linguistics at Vienna University. His interests include historical linguistics of the Celtic languages; morphonology and syntax of verbal systems in general; Germanic languages; Italic languages; Albanian and the Balkan languages; language contact as a factor of diachronic linguistic change.

Elmar Ternes. Professor emeritus, University of Hamburg, Germany. Taught phonetics and phonemics, general linguistics, Celtic languages. Linguistic fieldwork in Brittany, Scotland and Northern Italy. Main interests at present: language typology, tone languages, phonetic transcription.

Nicholas J. A. Williams was born in London. He read Classics, English and Celtic in Oxford, and received a PhD in Celtic from Queen's University, Belfast. From 1976 he taught Irish in University College, Dublin, retiring in 2007 as Associate Professor emeritus in Celtic Languages. He has written widely on Irish, Manx and Cornish. His Cornish translation of the Bible will appear in 2011.
